A liquid detergent sanitiser formulated for the cleaning of beer dispense, soft drinks dispense and cellar tank delivery systems in the Licensed Trade, ensuring rapid removal of yeast and other residues.

PHYSICAL CHARACTERISTICS

Prosan Ultra is a purple, mobile liquid containing a blend of potassium hydroxide and sodium hypochlorite together with non-hazardous water softening agents.

Contains. 14% Potassium Hydroxide and <1% Available Chlorine.

S.G. @ 20oC. 1.160.

pH of 1% solution. 12.

APPLICATION

Prosan Ultra should be used for the cleaning of beer dispense and cellar tank delivery systems in the Licensed Trade. It is effective in thoroughly cleaning systems, when used at a rate in the range 1%v/v – 5%v/v.

Flush the system with fresh water to remove any beer residue.

Prepare a solution of Prosan Ultra at a dilution rate of 1%-5% v/v i.e. 0.5 litres to 2.5 litres per 50 litres of water.

Fill dispense system and allow to soak. Cleaning solution should be allowed to soak for no more than 30 minutes.

To improve cleaning pull fresh cleaner into the system every 10-15 minutes.

Rinse system thoroughly with clean water.
